## **DETAILED ACTION**

### ***Response to Remarks***

1. Applicants' arguments, filed on 6/27/05, have been approved and entered. They have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8-10, 15-25, 49-63 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Instant claim 8 discloses the new limitation "wherein said composition of matter is free of urea side products", which means that the composition of matter comprise 0% of urea side products. However the specification on page 15, for example, disclose that the composition is substantially free of coupling reagent side products, particularly urea product. The specification defines "substantially free of coupling reagent derived side product", on page 10, as to products

Art Unit: 1637

having levels of coupling reagent derived side products that are from about 5% to about 0.01%, more preferably from about 1% to about 0.1% of the dendrimer composition.

Therefore the added limitation "wherein said composition of matter is free of urea side products" is New Matter because there is no disclosure of products having levels of coupling reagent derived side products that are 0%.

3. Claims 8-10, and 15-25 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a composition of matter substantially free of urea side products, made by the process as disclosed in pages 49-50 of the specification for example, does not reasonably provide enablement for composition of matter, free of urea side product as it is undue experimentation as to what type of process is used to obtain said composition matter as claimed in claim 8 for example. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. The specification does not define any other methods (beside the one disclosed in pages 49-50 for example) which could produce said composition of matter substantially free of urea side product. Therefore it is undue experimentation as to what process is to be used for the making of the composition of matter as in claim 8 in view of the breadth of the claims, which can encompass other type of chemistry.

4. No claim is allowed.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire **THREE MONTHS** from the date of this action. In the event a first response is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than **SIX MONTHS** from the date of this final action.
